Discovery ERP:
2026 Module & Feature Checklist

Top 3 Universal Features

AI Empowered Tools
Eliminate manual data entry by significantly improving efficiency with AI tools securely trained on your company's unique data and workflows. Instead of punching information in, Discovery ERP users simply review and verify.

Simplified UI
Access Discovery ERP through a clean, browser-based user interface designed for mobile, desktop, and tablet use. From field service professionals to decision makers, every user can navigate the system with confidence, regardless of their technology comfort level.

REST API
Integrate Discovery ERP with third-party apps, software, and your custom workflows through a flexible REST API. Easily pull and post data into the system to support greater connectivity across your business.
